ABOUT ME

Dynamic Computer Science student with a strong foundation in algorithms, data structures, and Python, and machine learning. Passionate about learning and possess a strong work ethic with a resilient mindset, always committed to overcoming challenges and achieving my goal. Eager to optimize large-scale data processing and deliver impactful insights at an innovative tech company

TECHNOLOGIES

Technical skills: Python (basics), Mysql, HTML, Java

Soft skills: Critical Thinking, Resilience, Adaptability, Time management, Team Co-operation

EXPERIENCE

Python For Machine Learning Intern, VEI Technologies, Coimbatore

- Developed machine learning models using Python libraries like scikit-learn and TensorFlow to predict customer churn with 92% accuracy.
- Engineered data preprocessing pipelines in Python with pandas and NumPy, handling large datasets for feature extraction and model training.
- Collaborated on a team project to deploy ML models via Flask API, optimizing inference time by 40% through hyperparameter tuning.

PROJECTS

The Thermo-Autonomous Watch

- Thermo-autonomous watches harness body heat to generate power, eliminating the need for batteries or frequent charging.
- They feature thermoelectric generators that convert thermal gradients between skin and ambient air into electricity for self-sustaining operation.
- Ideal for adventurers, these rugged timepieces offer reliable timekeeping in extreme conditions without manual winding or light exposure.

EDUCATION

V.S.B College Of Engineering Technical campus, B.E Computer Science and Engineering, Coimbatore
Sep 2023-May 2027

Lakshmi Matriculation Hr.Sec School, Computer Science

jun 2022-May 2023

CERTIFICATES

- Programming In Python
- Python For Machine Learning
- Data Science
